Carter has publicly claimed V. FL will adopt no-wake ordinance over an entire private lake with only part of the lake's bed inside the V. of FL borders.
Lake County officials have falsely told V. of FL officials that 3-mile-extension statute can be coupled with a radical, village's zoning ordinance
Carter TWICE asked the V. FL officials to adopt it without a 1st hearing (so that property owners would only find out after it was adopted.)
